HOBBIES & ACHIEVEMENTS

My hobbies include sports, more specifically soccer. Soccer has given me some of my greatest achievements and experiences. I had the honour of representing the Republic of Ireland at youth international level. Soccer has also presented me with the opportunity to obtain a soccer scholarship and become a student athlete. I was able to meet new people from diverse backgrounds and form friendships while travelling the U.S.

EDUCATION

BSc Product Design (Marketing & Innovation), National University of Ireland, Maynooth

Sep 2017 — May 2019

Earned a Second Class Honours (2.1) in each semester

BSc Industrial Design, University of Bridgeport Shintaro Akatsu School of Design

Aug 2019 — May 2021

GPA of 3.75 including two Presidents List Awards

WORK EXPERIENCE & COLLABORATIONS

Collaboration as an Industrial Designer, Unilever

Sep 2019 — Dec 2019

Unilever presented our Industrial Design class with the task of designing a deodorant which was environmentally friendly through the use of sustainable materials and refillable methods. My work included researching materials, prototyping using foam and 3D printing, concept ideation through sketching, and delivering my final design through CAD and Keyshot renderings.

Collaboration as an Industrial Designer, Comar

Sep 2020 — Nov 2020

Comar Company presented our Industrial Design class with the task of designing packages that would potentially address the needs of their medical and health categories of containers. I designed a portable wipe dispenser whereby its function allows the user to obtain a wipe by simply tapping on the lid. I also created a segmented wipe system with colour coded wipes which included unique colours for baby wipes, wet wipes, anti-bacterial wipes and anti-virus wipes. My product concept was conceived to combat the spread of COVID-19 and also to match with an increased demand for better access and longer shelf life for this consumable.

Collaboration as an Industrial Designer, Assa Abloy

Jan 2021 — Feb 2021

My design earned second place which included receiving a Wacom Intuos tablet. Sargent Brands of the ASSA ABLOY Company presented our Industrial Design class with the task of designing hands-free hardware, to help mitigate the spread of bacteria and viruses. The clients design brief included strict guidelines in regards to the hardware and its need to function within a commercial environment. The design brief was also mandated to pivot as a lever and be intuitive to its users.

Sales Advisor, Schuh

Nov 2017 — Aug 2019

Designer, Local Barber, ACB

Jun 2020 — Jun 2020

Through networking within my local area, I was presented with the task of designing a logo for a new barber business. I sketched numerous designs in order to achieve a final design which I created through Photoshop. Furthermore, I designed pictures through photoshop which were placed in frames and put on the walls of the barber shop.
